

SETUP

What are Anaconda and Miniconda ? (anaconda and miniconda are same, just the size diff is there)

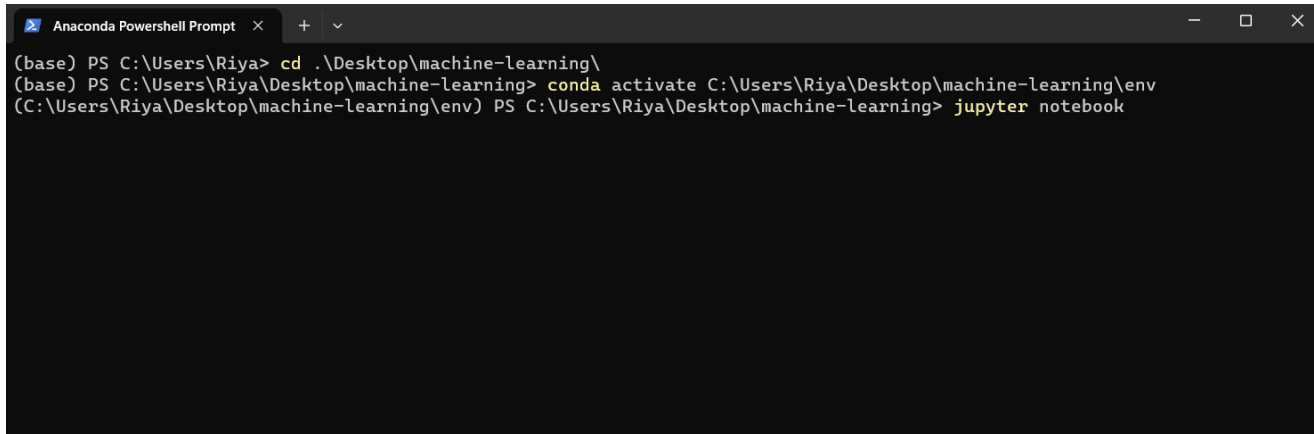

How to install the packages in the project ?

```
Anaconda Powershell Prompt
(base) PS C:\Users\Riya> cd .\Desktop\
(base) PS C:\Users\Riya\Desktop> cd .\machine-learning\
(base) PS C:\Users\Riya\Desktop\machine-learning> conda create --prefix ./env pandas numpy matplotlib scikit-learn
```

Command for installation:

```
conda create --prefix ./env pandas numpy matplotlib scikit-learn conda intall jupyter
```

```

Anaconda Powershell Prompt
(base) PS C:\Users\Riya> cd .\Desktop\machine-learning\
(base) PS C:\Users\Riya\Desktop\machine-learning> conda activate C:\Users\Riya\Desktop\machine-learning\env
(C:\Users\Riya\Desktop\machine-learning\env) PS C:\Users\Riya\Desktop\machine-learning> jupyter notebook

```

after installation , how to activate the env and start the jupyter notebook

```
conda activate {yout created project dir like: "c:/Users/Riya/Desktop/Machine-learning"}\env then write
jupyter notebook
```
